Not all indicators of malware and suspicious programs are displayed. Get your own cloud service or the full version to see all the details. Malicious indicators 4. External. This is what we put on the websites. The external origin URL (per site) for your own site. If you are a software developer, you can provide an external URL for your site. It will give you access to your files when they become available. To do this, you need to provide the source code for at least one of your PHP files

in order to establish a link to the source code. 5. Identification. This is what gives the identifier for your program or site.
